THE LIVINGSTON LOFT II

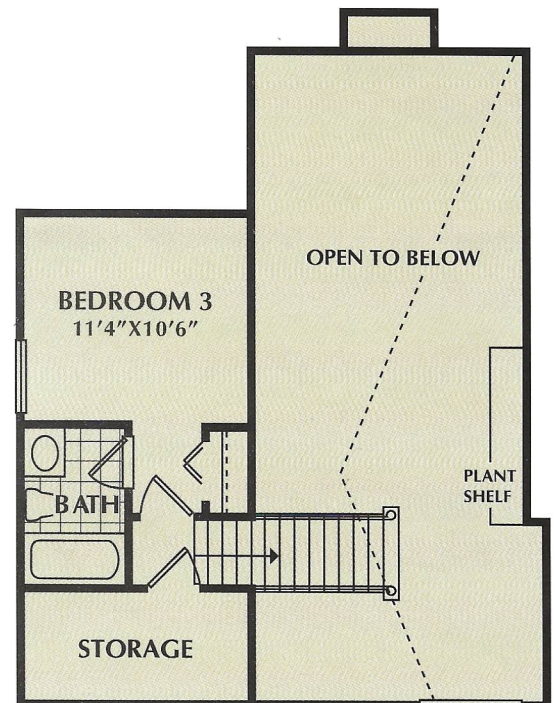

Ceilings that soar in rooms filled with natural light highlight the design of the Livingston II.

All rooms flow from the foyer where the dining area connects with the living room with its center-placed fireplace flanked by windows and optional skylights. The adjoining nook features a studio ceiling and is separated from the kitchen by an angled peninsula. The cathedral ceiling, private bath, walk-in closet and optional bay window are special touches in the master suite. Another first floor bedroom/library includes a cathedral ceiling and a bay window in the right hand units. The loft includes a third bedroom, full bath and more storage.

First Floor

Left hand unit shown with circle top window. Bay window is standard when built as right hand unit, see elevation.

Second Floor
